

Sam Tobin-Hochstadt

Interests

Gradual Types, Extensible Languages
Shipping Code, Teaching Programming

Projects

Typed Racket, Racket Contracts
JIT Compilers, JS Modules

Racket

A programmable programming language

For building big and little languages

Testbed for programming language research

Racket

A programmable programming language

For building little languages

Testbed for programming language research

Shipping code!

Typed Racket

A gradually-typed dialect of Racket

Accommodates existing Racket programs

[ICFP 2010, OOPSLA 2012, ESOP 2013]

Can use existing Racket libraries

[DLS 2006, POPL 2008, OOPSLA 2012]

Uses types to optimize your program

[IFL 2010, PLDI 2011, OOPSLA 2012]

Typed Racket

A gradually-typed dialect of Racket

The inspiration for Typed Clojure

Developed by Ambrose Bonnaire-Sergeant

Extending to dependent types

Work by Andrew Kent

Pycket

Do JIT compilers speed up functional languages?

Using RPython to find out

With Jeremy Siek and Spenser Bauman

Joint with Kings College and HPI Potsdam

Pycket

Do JIT compilers speed up functional languages?

Come talk to me!
